JAN 17 2006
DEPARTMENT OF
WATER RESOURCES

November 8, 2005

Mr. Karl Dreher
322 Front Street
P.O. Box 83720
Boise, Idaho 83720

Dear Mr. Dreher:

The following pages contain the annual report of the distribution of water for the Big Lost River, From November 1, 2004 to October 31, 2005

The Authority to distribute water using water rights in the Basin 34 Directors Report was provided by the Memorandum decision and order granting the Department of Water Resources' motion for interim Administration with Limitation, or decrees issued by the SRBA court.

Very truly yours,

Robert Duke

Robert Duke
Watermaster
District #34-Big Lost River

WATER DISTRICT #34
P.O. BOX 53
MACKAY, IDAHO 83251

SUMMARY OF ANNUAL REPORT FOR 2005

Basin #34 experienced the best water year in the past 5 years. A futile call was initiated within the 1st week of the irrigation season. Fortunately an abundance of spring rains and adequate snow pack in the Antelope drainage made the water rights being called for deliverable. Irrigation early in the season was minimal because of the rains.

Mitigation was called for at the beginning of the irrigation season and satisfaction of mitigation was trying to be met.

On May 24th, 2005 the Mackay Reservoir filled and water crested the spillway. This contained through the 1st week in July with a few exceptions of a couple of days.

Recharge efforts began in the middle of May and continued until the 1st week in July under Water Right 34-07573 & 34-07571. The effect of the Recharge appeared to be positive to Ground Water Levels.

The adequate natural flow and storage water in the Mackay Reservoir delayed the greatest impact of Ground Water Diversion until the middle of July.

At the beginning of the irrigation season all 1885 Water rights were called. On May 10th, 2005, all 1884 rights were called. On May 17th, 2005, all 1902 rights were called. On May 20th, 2005, all surface water rights were called and remained on until July 7th, 2005

Through the Recharge efforts IDWR had credited Water District #34 with over 3800 Acre Feet towards Mitigation, Fortunately the water rights calling for Mitigation were deliverable through out the irrigation season.

There was approximately 14% of storage water left in the Mackay Reservoir. This hasn't happened for the past several years. Current inflow indicates a good probability of filling the reservoir in the 2006 Irrigation Season.

The Howell Gauge peaked at 3240 cfs and good flows continued through the middle of July.

Robert Duke

**Clarification of Flow Data
For
Gauging Stations**

Reported flows in the attached tables for gauging stations below the Moore Diversion and Arco Canal (or below the Munsey Diversion), were estimated by water district staff. These reported flows are the flows that were entered and used in the IDWR Big Lost River Flow Accounting Program. Flows were estimated by measuring the head of water over concrete diversion dams and application of a weir discharge formula respectively at the Moore-Eastside and Arco-Munsey diversion dams.

The USGS tables titled station number 13120500 Big Lost River At Howell Ranch and station number 13132500 Big Lost River Nr Arco are the final data prepared by the USGS for it's gauging stations located north of the Mackay Reservoir and four miles southeast of Arco, respectively.

Flow reported for the gauging station at Leslie are based on actual 1998 current meter measurements on the Big Lost bridge near Leslie and the development of a stage-discharge rating table by IDWR and the Watermaster. Tables reporting flows for the Big Lost River below the Mackay Reservoir (or the 2B gage) include data as read and recorded daily by the Watermaster and as reported by the USGS.

IRRIGATION YEAR 2005 TOTAL CFS:0.0 TOTAL AC-FT: 0

**Diversions in CFS for
Antelope, Alder Creek, and Pass Creek
For Year 2005**

DIVERSION	MAY	JUNE	JULY	AUGUST	SEPT.	OCT.	TOTAL
Antelope	2,770.50	4,907.70	4,627.67	2,797.10	397.66	134.90	15,635.53
Alder Creek	770.64	817.76	451.74	139.86	15	41.50	2,236.50
Pass Creek							335.95
Total							18,207.98

Diversion totals are reported in CFS/Cubic Feet per Second
